

Hydraulic track jack

Hydraulic track jack HJ series

The new hydraulic track jacks with included pump HJ series, made with high quality material, ensure high lifting performances both in railway field and industrial field. The adequate length of the lever, the tap for lowering, the valve that limits overload, guarantee precision in the work with minimum effort and maximum safety for the operator. The carrying structure, with rotation of 360 °, is realized so to support the load both on the foot and on the head of the jack. Ergonomic handle positioned on the center of gravity of the frame for easy transport.

| Dati tecnici | | HJ 5 | HJ 10 | HJ 25 |
|--------------------------|---------|---------|---------|---------|
| Capacity on toe and head | daN[Kg] | 5000 | 10000 | 25000 |
| Lifting range of toe | mm | 25-230 | 30-260 | 58-273 |
| Lifting range of head | mm | 368-573 | 420-650 | 505-720 |
| Diameter of head | mm | 90 | 110 | 155 |
| Dimensions of base | mm | 140x215 | 170x205 | 210x420 |
| Height | mm | 380 | 420 | 505 |
| Weight | daN[Kg] | 24 | 34 | 102 |
